\* A mosquito batch is a collection of mosquitoes sorted by species, date of collection, and trap location.

‡ This week, mosquitoes were submitted from Cheshire, Hillsborough, Rockingham and Strafford counties.

## **NEW HAMPSHIRE ARBOVIRUS TEST RESULTS 2016 Arboviral Season**

### **MOSQUITO BATCHES**

There have been no EEE or WNV positive mosquito batches identified in New Hampshire in 2016 to date.

### **ANIMALS**

There have been no animal cases of EEE or WNV identified in New Hampshire in 2016 to date.

### **HUMANS**

There have been no human cases of EEE or WNV identified in New Hampshire in 2016 to date.

### **Data notes:**

1. Data provided are those for which final results are available. Data are current as of 7/19/2016.
2. Test results include only those specimens tested with results finalized during the week being reported on. Pending results from the previous week are not included.
3. Prior years' data is cumulative.
4. YTD = All specimens submitted beginning 01/01/2016 through the week being reported on.
5. WNV = West Nile virus. EEE = Eastern Equine Encephalitis.
