PROTECT OUR PONDS: UNDERSTANDING WATERSHEDS AND CYANOBACTERIA

Water, water everywhere, but is it safe to swim? Did you know that for over two months in 2023, residents in two of our ponds in Pelham were warned to stay out of the water due to toxic cyanobacteria blooms? Want to learn more? Join us on April 6th from 8:30am-12 noon for Protect Our Ponds: Understanding Watersheds and Cyanobacteria at the Pelham Town Hall sponsored by the Town of Pelham and the Pelham Conservation Commission. All are welcome to this free event featuring speakers from the NH Department of Environmental Services (NHDES), Dartmouth College, and NH Lakes. Hands-on activities and exhibits from New Hampshire organizations will be present as well.

Water is important to all of us. Invite your neighbors and friends!
For questions, contact Dena Hoffman at dhoffman@pelhamweb.com.

Time	Activity
