Start of Meeting Site-Walk – 5:00PM

Discussions with multiple side conversations & questions going on throughout the meeting. The results appeared to have an agreement (no vote) on possibly adding one bridge. As the trail continued there were two mud-spots that appeared to be puddles but due to 2 inches of rain the prior 24/48 hours they were full. One was due to wear from a sharp turn and the other just a low spot. Neither area requires bridges & laying down some good material should take care of those areas of concern. Maintenance will likely be needed in the area especially where the trail turns. We agreed getting measurements and amount of material would be a good next step and can discuss it in the May meeting. Nick Spanos to get me measurements. Paul G & Ray B stated they would donate their time to construct a bridge. No motions made and no votes.

End of Site-Walk: 5:28PM
