Linda Irish-Simpson

Nick Spanos

Ray Brunelle

Deb Waters(Forestry advisor)

Tim Kennedy (Trail volunteer)

George + Helen Gagne- Area residents

Tim + Joan Taylor- Members of the public

- **To look over the areas where we will be installing gates to block wheeled vehicles access to the Town Forest trails.**

Again, it was made clear to all, that the gates will not block the Class VI roads. They will only block wheeled motorized travelers from the Class VI roads to gain access to the trails with wheeled vehicles. Unless in an emergency situation, in that instance the Fire Department and Police Department will have the gate combination to access for rescue or put out fire.

- **We will assess the damage that has been done by wheeled vehicles and come up with strategies to fix the damage.**

At this time, the damage is so severe, that it is not worth the money or time by the trail volunteers to perform any repairs until the gates are installed and the trails do not have motorized wheeled activity on them anymore. Any repairs that would be made beforehand, will only get destroyed by motorized wheeled activity.

The team decided it is best to wait on fixing the trails until the gates are in and motorized wheel access is no longer.
